CBA 100M-110
10 kHz TO 100 MHz 110 WATT CLASS A BROADBAND AMPLIFIER

- **Class A linear and low distortion design**
- **Ideal for low frequency tests using various strip line devices**
- **Mismatch tolerant and unconditionally stable**
- **Rugged design for EMC testing**

This low frequency amplifier can be used in conjunction with other Teseq amplifiers to cover the entire frequency range from 10 kHz to 6 GHz with convenient frequency break points allowing you to optimise the power level in each range.

The Class A design ensures a high reliability, low distortion linear performance across the frequency range. This design also ensures that the amplifier will continue to operate at full power even when presented with an open or short circuit at its output.

The unit is powered from a switched mode power supply for high efficiency, high power factor and wide voltage range operation. The unit is air-cooled with integral fans, and is protected against faulty cooling by excess temperature sensing. A safety interlock connector is provided, which the user can short circuit to ground, to put the amplifier into standby mode. Front panel indicators are provided to indicate over-temperature and rf interlock operation.

CBA 100M-110
10 kHz TO 100 MHz 110 WATT CLASS A BROADBAND AMPLIFIER

Technical specifications

Frequency range (instantaneous)	0.01 to 100 MHz
Rated output power	110 W minimum (140 W typical)
Output power at 1 dB gain compression	90 W minimum (100 W typical)
Gain	51 dB
Third order intercept point (see note 1)	61 dBm
Gain variation with frequency	±2 dB
Harmonics at 90 W output power	Better than -20 dBc
output impedance	50 Ohms
Stability	Unconditional
Output VSWR tolerance (see note 2)	Infinite any phase
Input VSWR	2:1
RF connector style	Type N female
Safety interlock	BNC female, s/c to mute
USB interface	Optional
Supply voltage (single phase)	85 to 264 Vac
Supply frequency range	45 to 63 Hz
Supply power	<500 VA
Mains connector	IEC320
Conducted and radiated emissions	EN61326 Class A
Conducted and radiated immunity	EN61326: 1997 Table 1
Mains harmonic currents	EN61000-3-2
Voltage fluctuations and flicker	EN61000-3-3
Safety	EN61010-1
Case dimensions	19 inch, 4U case, 440 mm deep
Mass	20 kg
Operating temperature range	0 to 40°C
Options (select at time of ordering)	
341-725	Bench model with front panel mounted input/output connectors
341-825	Rack mountable with front panel mounted input/output connectors
341-925	Rack mountable with rear panel mounted input/output connectors

Notes:
1. The third order intercept point is a nominal value, as its calculation depends upon the power level at which distortion measurements are made.
2. Output VSWR tolerance is specified for excitation within the permitted levels and frequency range.
